About This Content

Embellish your landscape with the River expansion!

The River expansion lets you embellish your landscape while changing up the starting location. The River is made up of 11 tiles, which replace the starting tile. Take turns placing the River tiles while also deploying meeples. Once you've used up the River tiles, continue playing as usual with the other tiles. You must follow the illustration, as always. This expansion lets you more evenly distribute the landscape you'll create over the course of the game.

Almost a necessity for Carcassonne. Makes the early game much more open and enjoyable, allowing for a range of tile placements once the river is complete.. Edit: Works fine you need to update the game manually for the dlc to properly install.. I have played Carcassonne with river as a table top game for 5 years. I love the river. So when I saw Steam had Carcassonne I ordered the river and main games. I had trouble installing the river, but was able to finally install the main game. How I want to activate the river. But I can not find a way to do that. Bad Bad Steam!!!!
