Heyo! Sonoket 3 sentence review go: A short and surprisingly challenging game where walls and floors loop back on each other to create a mind-bendingly fun puzzle game. Very minimal design in the game as well as lack of menus and options detract from the game but not enough to not recommend it. Just a treat to play through at the pricepoint. If you want more than that I have a First 30 video up on the game where you can see the First 30 minutes of gameplay with some more thorough thoughts after it. Recommended! <https://youtu.be/mDIwNKwhJuI>. Heyo!
